LOW LEVEL SECURITY

DETER.

LOW LEVEL SECURITY SOLUTIONS

When your entrance needs to remain welcoming, yet at the same time make people aware that they are entering a protected area, then an entrance product that deters an unauthorised visitor is the ideal solution.

While all security entrances are a physical deterrent against intrusion, full height and waist-high turnstiles do not have presence sensors or alarms to alert guard staff of infiltration. Therefore, their presence serves as a deterrent against casual attempts at defeat by climbing or crawling over.

TURNSTILES AND ACCESS GATES

Safe and secure entry to a secured area should be easy and comfortable for all users. Our range of full and waist-high turnstiles as well as our wide lane access gates provide precisely that.

These low security deterrent solutions are straightforward and effective in controlling large volumes of people as well as managing disabled access or large deliveries – which require additional room for a pleasant user experience.

KEY BENEFITS

- Serves as a visual deterrent against possible infiltration
- Assists guard force in managing the flow of employees and guests into a building

- Creates a visual and psychological balance between being welcome and secure
- Ability to control the number and direction of people passing through the entrance
- Works in tandem with visitor management software for a digital record of all guests inside buildings
- Integration possible with virtually any access solution
- Robust and long-lasting

ADVANTAGES FOR USERS

- A feeling of safety and security in the workplace or public environment
- Easy, safe and fast to use

Low security entrances may also be used for “exit only”, allowing people to leave but deterring them from entering.

PRODUCTS IN THIS CATEGORY.

THE TURNLOCK RANGE

Suitable for both indoor and outdoor locations, the Turnlock range comprises of durable, low maintenance full-height turnstiles. Created for high traffic areas in harsh conditions, our full height turnstiles can stand up to extreme environments with consistent, dependable operation.

OUR TURNLOCK RANGE FEATURES THREE MODELS:

Turnlock 100:

A rugged turnstile designed for harsh outdoor environments

Turnlock 150:

A versatile solution that combines durability with aesthetics

Turnlock 200:

A transparent turnstile that provides the finished look of a revolving door

THE TRILOCK RANGE

Our Trilock range of waist-high turnstiles cater for both robust exterior crowd control and provide chic interior entry-level security to support guard staff in busy areas. The range comes in a variety of sizes, and some even have the advantage of portability for security-on-the-move. Reliable and built to last – this range remains as popular as ever.

OUR TRILOCK RANGE FEATURES FOUR MODELS:

Trilock 75:

A flexible and reliable tripod turnstile

Trilock 60:

Durable and secure

Transpalock 900:

Elegant waist-high indoor turnstile

THE WIDE LANE ACCESS GATE RANGE

Side gates are an important component of your overall risk mitigation strategy. This type of entrance not only supports disabled access but also provides a comfortable alternative to users such as those who are carrying large bags, pushing prams – or simply older and more comfortable with a wider option. These gates can easily integrate with other (higher security) lanes and with most access control systems.

OUR WIDE LANE ACCESS GATE RANGE FEATURES FIVE MODELS:

Winglock Swing:

An intuitive single-wing side gate coordinating with the Lifeline series of speed gates

Winglock 900:

An independent wide access gate

Twinglock 900:

An uncomplicated double-wing access gate

Turnlock Side Gate:

Full-height side gate to complement the Turnlock full-height turnstile range

Trilock Side Gate:

A resilient side gate to complement the Trilock waist-high turnstiles

LEVEL UP OVERVIEW.

If our standard specifications do not quite suit your need, we open up opportunities for you to 'Level Up' where it counts most. You can also do this according to your most motivating value driver.

Talk to your entry expert who is trained to work with you to know where you will get the most impact in terms of levelling up in the areas most essential to you.

You can Level Up in any of these categories:

THROUGHPUT

Add: width / height / configurations

SECURITY

Add: Additional sensors / tall glass

SAFETY

Add: Fail-safe / fail-secure / warning decals / audio and visual cues / Touchless integration

AESTHETICS

Add: Material colour / shape / branding

TECHNOLOGY

Add: Biometrics / access control

COMFORT

Add: Disabled entry / lighting / energy saving mode

SERVICE

Add: Service and maintenance packages

SERVICE

TRAINING AND SUPPORT

With hundreds or thousands of visitors passing through an entry every day, proper installation and continued operation are vital. Professional installation and regular service and maintenance can help minimise unexpected down-times. Boon Edam's service and maintenance teams are familiar with the effects of throughput and local weather conditions on your entry and can offer service and maintenance contracts that correspond to your requirements perfectly. With a program of regular training and certification for all our installation and maintenance staff, their knowledge and experience are assured.

THIRD PARTY INTEGRATION

All of the products in the low security entrance range can easily integrate with most access control systems. Dry contacts are provided, and the side gate can conveniently form part of your overall security picture, for example, via the BoonTouch. If you want to 'Level Up' the security of your side gate – it is possible by seamlessly adding an additional access device such as a card reader or barcode scanner. This can be integrated on the products column, or we can provide you with a stand-alone pedestal which is perfectly coordinated to your other security entrances.

OUR REACH IS GLOBAL.

We have been in business for more than 140 years manufacturing premium aesthetic and security entrance solutions in the Netherlands, United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors, but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint as well as a personal grasp of local markets and their unique entry requirements.
