

COMPANY
PROFILE.

Boon Edam Limited
T +44 (0) 1233 505 900
E uk.contact@boonedam.co.uk
I www.boonedam.co.uk

Our goal is to craft an entrance which offers peace-of-mind in the most secure, and welcoming way.

WE FOCUS
ON OUR
CLIENTS.

Established in 1985, Boon Edam Limited was the first international subsidiary of Royal Boon Edam International B.V. The Dutch-born company has come a long way from its humble beginnings, now employing over 1300 employees worldwide. As the market leader in revolving doors and security access solutions, Boon Edam has 20 international subsidiaries with three major manufacturing facilities in the Netherlands, China and the USA, and a well-established global distribution network with authorised distributors in over 55 countries.

Our United Kingdom subsidiary operates throughout Britain, including the Channel Islands and the Isle of Man with our head office located in Ashford, Kent. We sell, project-manage, install and service hundreds of revolving doors and security entrance products each year for a diverse and well-known client base.

We operate across a multitude of sectors, working with various clients from architects, contractors, multi-nationals, building facade and security subcontractors - to name but a few.

Boon Edam Ltd's National coverage brings together an unrivalled team of business, project and service managers, who through their experience and ongoing training can provide the perfect solutions for clients across the UK.

Our expertise and knowledge allow us to provide our customers with future-proof entry solutions that can be customised to fit your specification and requirements. All our services are provided in-house, allowing us to get to know you and your project.

Our fully employed nationally based specification, sales, project installation and maintenance teams ensure you receive a fully inclusive service throughout every stage of your project.

OUR PROMISE TO YOU.

CORPORATE RESPONSIBILITY

At Boon Edam, we are committed to being a responsible organisation. We recognise that we have a duty to those who work for us, local communities and the global environment. Boon Edam companies share the common objectives of being a responsible employer, being considerate of local communities and taking steps to make a positive impact on the global environment.

GREEN DESIGNS

Environmentally conscious product design has been a way of life at Boon Edam for over 100 years and this continues today in our research programmes that actively develop new green products, materials and manufacturing methods.

SUSTAINABILITY

As the world leader in entrance technology, Boon Edam constantly reviews each part of its global business and, in this process,

sustainability is a key component of the Group's business strategy. Locally we take sustainability seriously, and we have adopted a number of actions to improve how we perform as a business.

ISO 14001

ISO14001 is the world's most recognised environmental management standard, and by adopting this standard Boon Edam Ltd hope to better identify and reduce our environmental impact as a business. We have always considered our impact on the environment, and by obtaining the ISO standard we are visibly able to demonstrate this commitment to our customers, giving them confidence that our sustainability credentials are aligned with theirs.

CONTEMPORARY MASTERS

What began as a small Amsterdam carpentry shop in 1873, has evolved into a modern, innovative company that has never lost the sense of craftsmanship or family spirit. Our first revolving door was produced in that workshop back in 1903. The values and heritage that was at the heart of our brand back then continue to shine through in how we, to this day, work hand in hand with our customers.

OUR **PRODUCT** RANGE.

SUSTAINABLE AND CIRCULAR.

REVOLVING DOORS

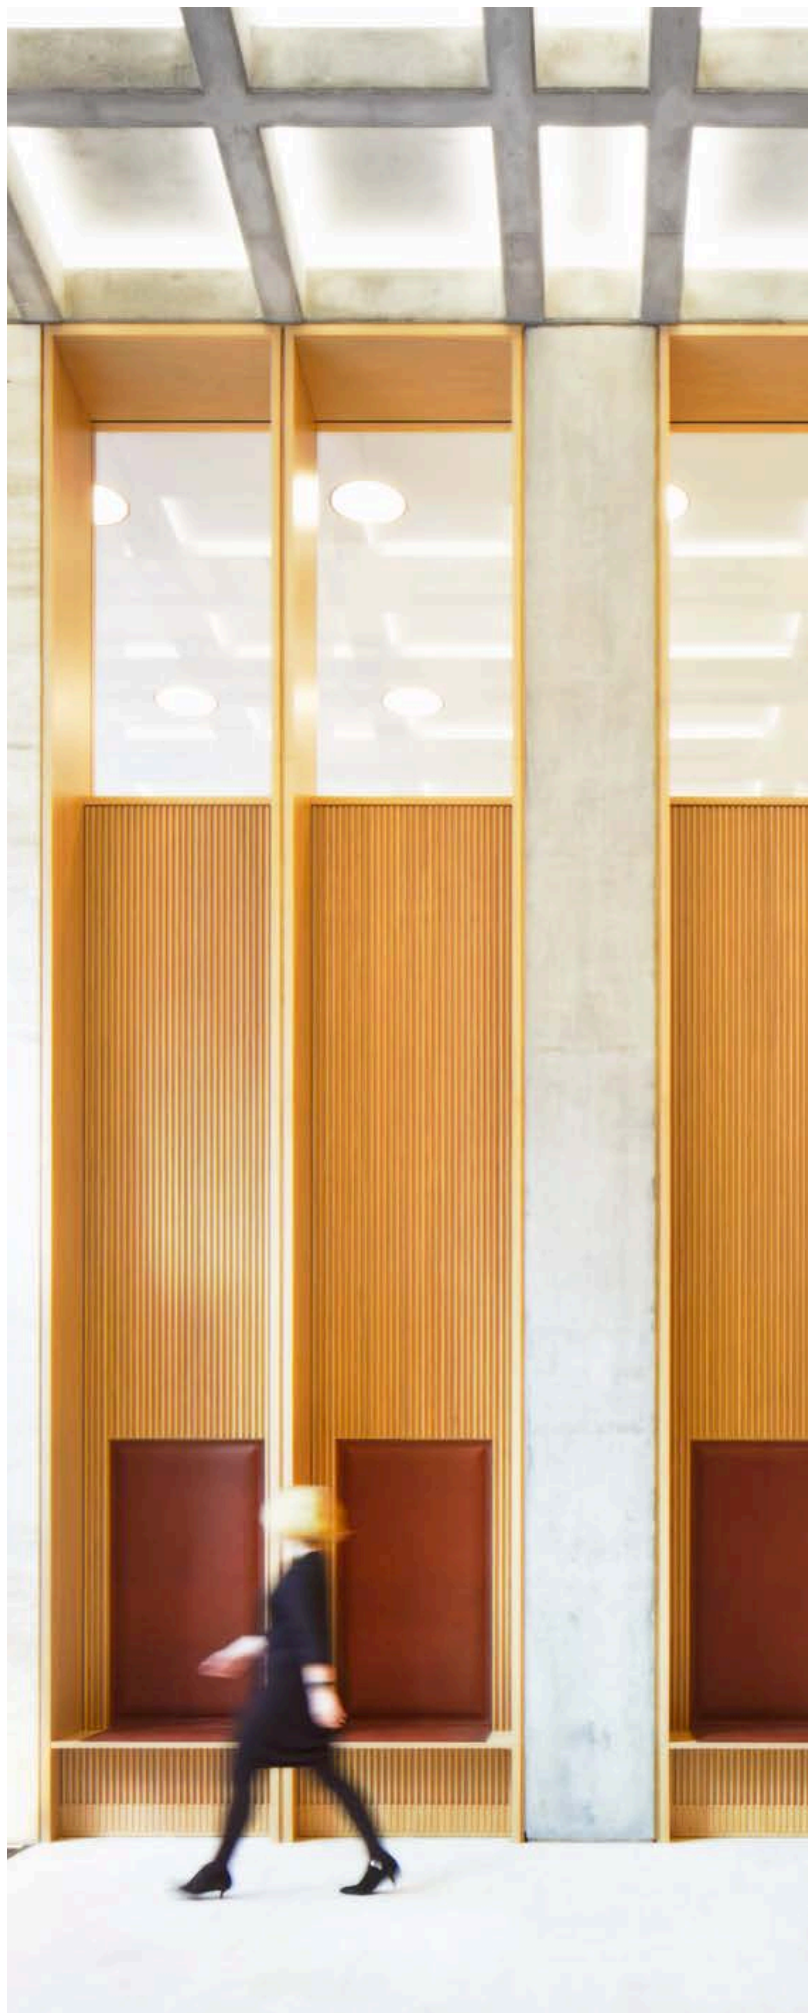

Combining quality engineering with flexible design and complete customer support, Boon Edam supplies the largest portfolio of revolving doors available. Whatever the scale and purpose, our designs can be adapted to meet almost any criteria.

Entrance Door Systems Revolving doors create a highly prestigious, safe efficient entrance to almost any building. It also provides the optimum solution between the outside and inside of your building as it is always open, yet always closed. This ensures immediate savings on energy costs along with creating a comfortable environment for staff and visitors to your building.

comfortable environment for staff and visitors to your building.

Our range of door products includes:

- ✓ Manual Revolving Doors.
- ✓ Automatic Revolving Doors.
- ✓ Security Revolving Doors.
- ✓ Circular Sliding Doors.
- ✓ Special Purpose Doors.

The Copyright Building, London.
Tourniket Type 1

SENSE THE SPACE INSIDE.

INTRODUCING THE **ORBIT TRISENS** A REVOLUTIONARY REVOLVING- SLIDING DOOR

The **Orbit TriSens** is like no other entrance seen before. Designed with the accessibility, safety, and security of every user in mind, the Orbit TriSens lives up to ambitious demands for better connected and more energy-efficient entrance systems. The spacious, three-winged high capacity revolving-sliding door is the ideal entry solution for hospitals, airports and universities, or areas with high pedestrian traffic or where large objects require quick and easy access.

This is the revolving door re-engineered to perfection.

For more information or to talk to an entry expert, please go to:

SAFETY AND SECURITY.

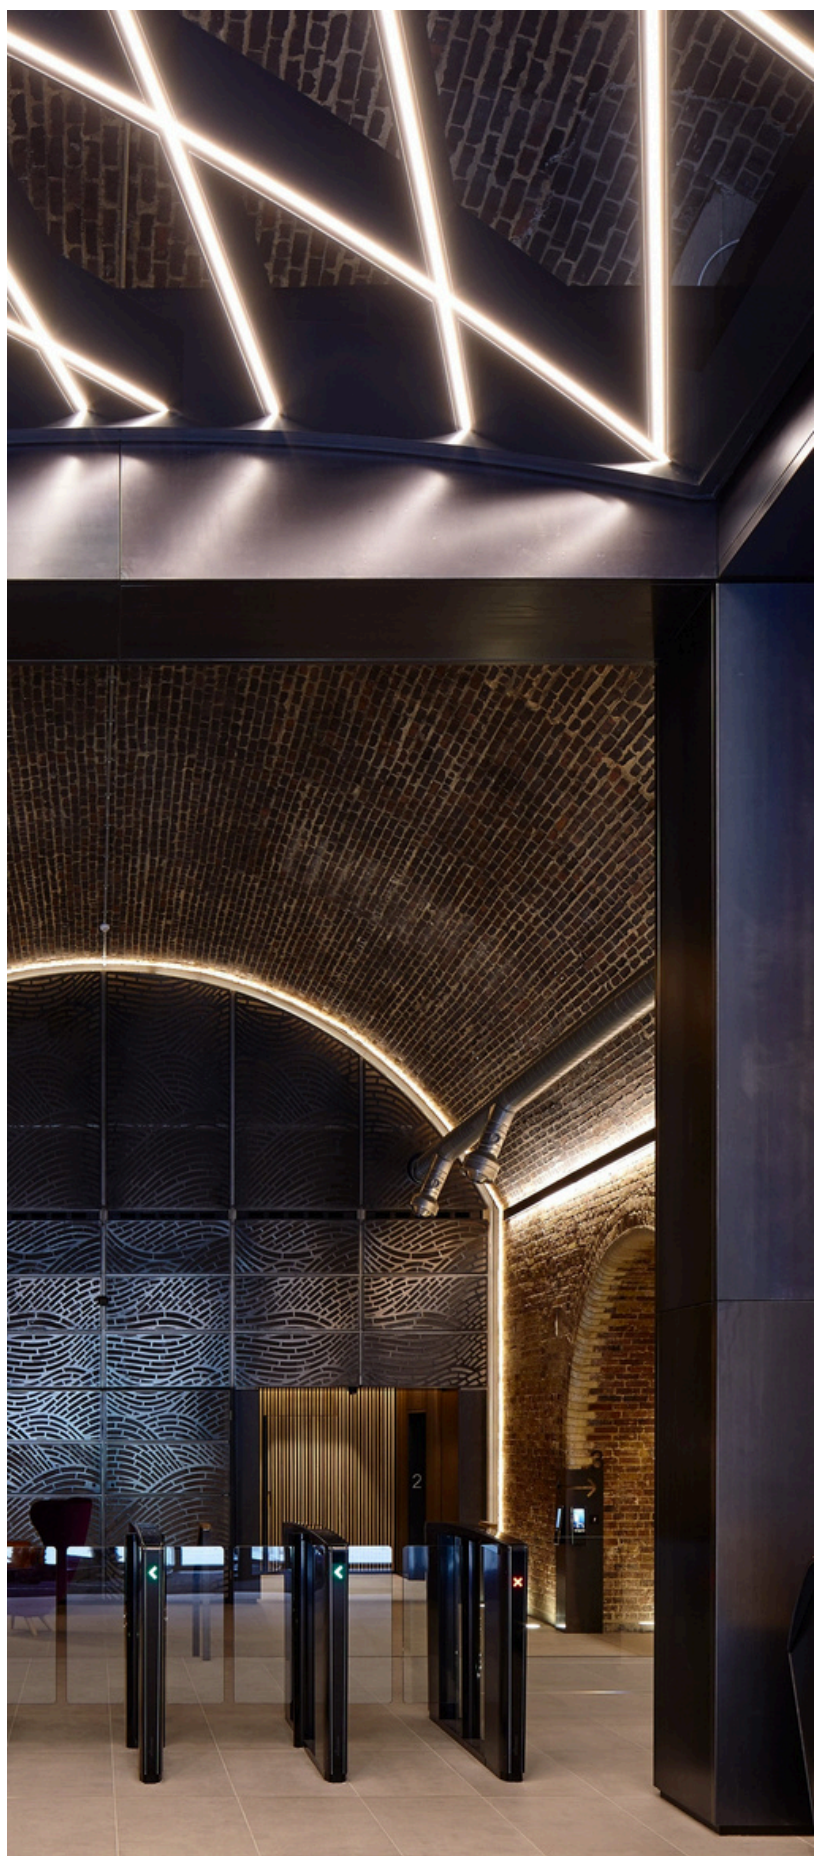

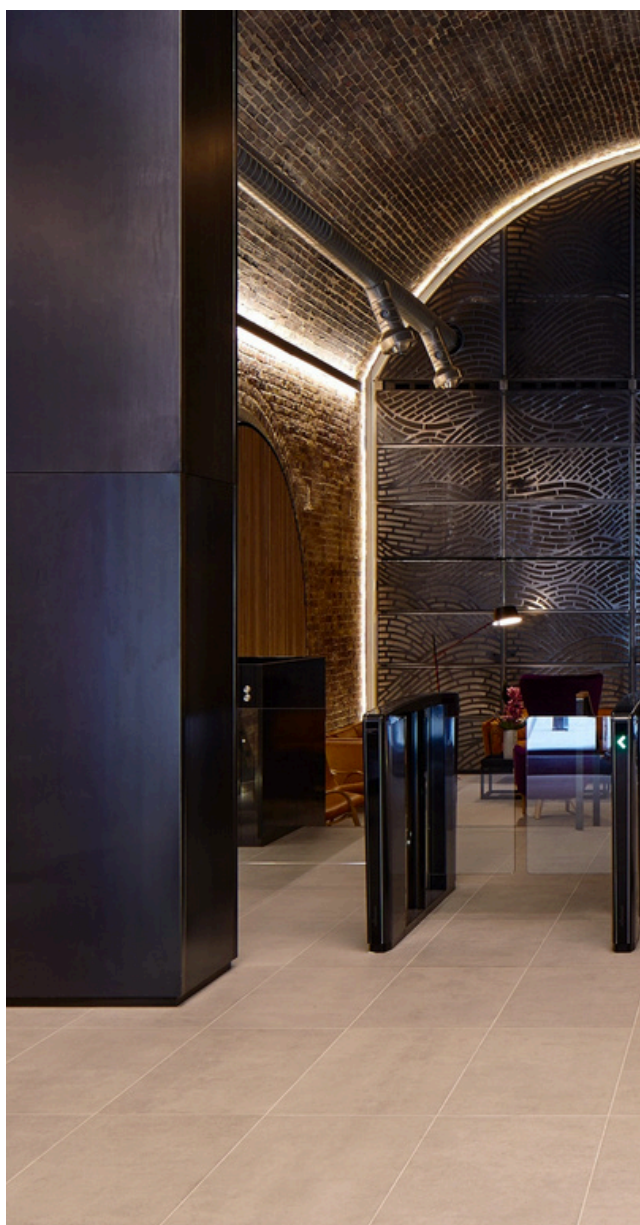

SECURITY SOLUTIONS

Today's world demands accessibility and security at the same time, and our wide range of ingenious security products does exactly that. We have developed one of the most sophisticated ranges of security access products that is available today, allowing you to monitor and manage the flow of people into and around your premises, and eliminate tailgating and piggybacking to keep your premises secure.

Designed to ensure seamless integration and trouble-free operation, all of our security access products are capable of interfacing with virtually any access control system throughout the world.

Our range of security access products includes:

- ✓ Security Doors.
- ✓ Mantrap Security Portals and Half Portals.
- ✓ Waist Height Security Turnstiles.
- ✓ Full Height Security Turnstiles.
- ✓ Pedestrian Speed Gates.
- ✓ Access Gates and Barrier Gates.
- ✓ Access Control Integration.

The River Building, London.
Lifetime Speedlane Swings (Business Edition)

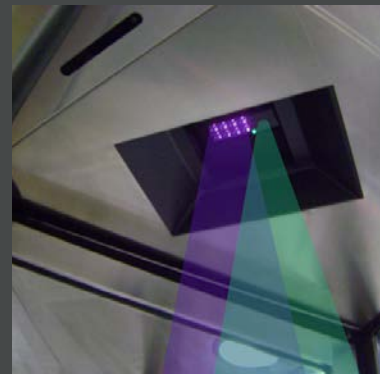

IN SAFE HANDS.

SECURITY ACCESS SOLUTIONS

The entry functions not only as the access and exit point for visitors - but it is also the main hub where different groups of people are managed and separated when needed. People pass through all day long, some requiring access to all areas of the buildings, others to just a limited part. Both the security of the sensitive areas of a building and the personal safety of the people visiting it must be guaranteed.

PART OF THE BIGGER PICTURE

Understanding the growing demand for higher security levels means that we are in an excellent position to partner with you to ensure your risk is minimised as we help you to integrate our security entrance solutions into the bigger picture of your overall building security. Our security access solutions are available as standard products covering high, medium and low levels of security. These products offer you the flexible opportunity to 'Level Up' in areas which are important and relevant to your specific security situation. These include increasing the security, comfort, aesthetics, technology, throughput and more.

SPEEDLANE COMPACT.

THE SHORTEST 'NO- NONSENSE' SECURITY SPEED GATE

Increase security levels within the valuable areas of your building with a straightforward, no-nonsense solution. The Speedlane Compact is the newest addition to the Boon Edam range of security products and is designed for smaller spaces that require additional protection. Although small in size, the Speedlane Compact does not compromise security or style, combining modern aesthetics with state-of-the-art technology. Advanced algorithms and technology ensure smooth and accurate passage, providing support to the guards and employees responsible for granting access to secured areas.

Boon Edam Ltd has hosted BIM Objects with the National BIM Library for many years, and are proud to have supported the platform for over a decade.

BIM OBJECTS.

BIM OBJECTS READILY AVAILABLE

Boon Edam Limited have proudly adapted to change in regard to the collaboration of product information for all parties involved in a project. This is why there are BIM objects readily available to our customers internally and through the National BIM Library. Of course, should the occasion arise, where the right product is not available, our dedicated team have the knowledge to work with you on designing a bespoke solution.

Being the first manufacturers of entrance solutions to offer BIM objects, we're leading the way in technological innovation and encouraging better visualisations, object adaptations and global collaboration. This is why we're working towards BIM Level 2.

Objects currently available in Revit & IFC formats:

- Tourniket Automatic
- Tourniket Manual

- Duotour
- Twintour
- Tourlock 180
- Circlelock Solo
- Speedlane Compact
- Lifeline Speedlane Swing
- Lifeline Speedlane Slide
- Lifeline Speedlane Open
- Winglock Swing

QUALITY PRODUCTS AND SERVICES.

In recognition to our commitment to quality, we are proud to say that Boon Edam Ltd are a ISO 9001:2015 Certified company. Being an ISO 9001 accredited company will ensure that the quality systems we currently have in place will remain consistent, and continuously improve our commitment to customer service.

In addition, Royal Boon Edam International B.V, our Group Head Office based in Holland, is an ISO 9001:2015 accredited company. The company is committed to total quality in all areas and employs a dedicated Product Quality & Health and Safety Manager.

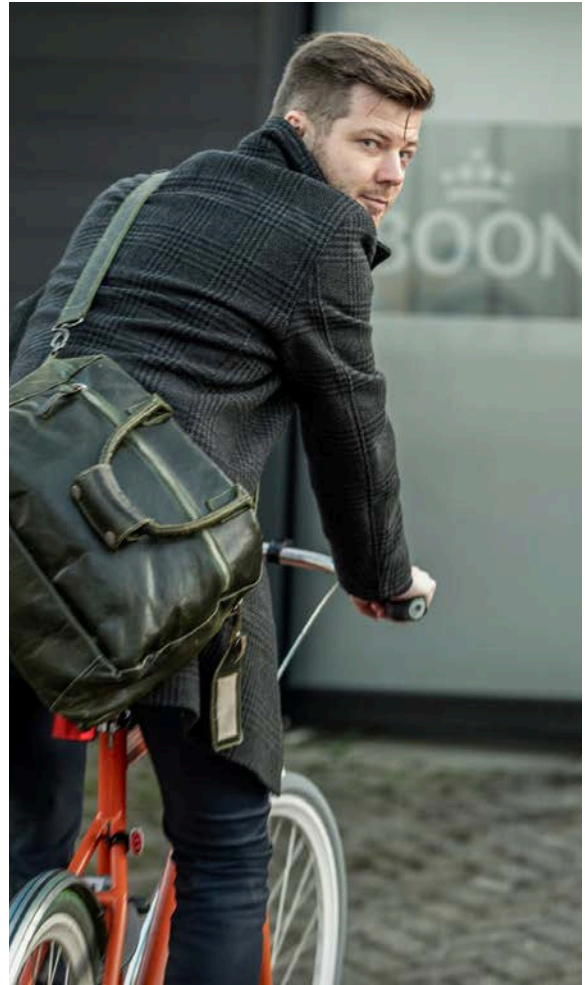

All installations, once completed, must be signed off with an internal quality checklist. The company operates a strict Non Conformance Report procedure with all of its suppliers. Any remedial work is quickly followed up by the dedicated Project Manager responsible.

Similarly, Regional Service Managers perform random checks on the standard of our service technician's work being performed on equipment under warranty or maintenance agreement. We are willing to adopt a customer's quality management system as long as it does not compromise the ideology behind our group quality philosophy and is of mutual benefit

OUR RESPONSIBILITY.

To preserve the earth for future generations, we need to reconsider the way we have built our societies. Traditional buildings and building methods have a large carbon footprint and a major impact on the environment. As a family company, we find it important that our children and their children get a chance to continue our work. We are proud to be the global market leader for the most environmentally friendly entry solution available: the revolving door. But this position also gives us the responsibility to take our sustainability efforts further.

LESS IS MORE

Wherever possible we use recycled or recyclable materials to manufacture our entry solutions. Any waste materials are collected and recycled or disposed of by the most environmentally friendly method available. Among other efforts, we have introduced a new technique for our powder coating facilities using Zirconium. This process provides the same qualitative results with far less impact on the earth. Whereas the waste materials of the traditional powder coating process would have to be disposed of with great care, this new technique allows for the waste to be disposed of directly through the sewer after Ph-testing without any harmful effects on the environment.

SAFETY AND COMPLIANCE

Building regulations, safety guidelines and accessibility requirements differ in each country. Our experts are fully up-to-date on the latest changes regarding your UK regulations and can provide advice and support when integrating these issues with the design and purpose of an entry.

Our experience with environmentally friendly entry solutions in the building industry also enables us to be a partner for those aiming to improve the sustainability of their buildings. We can provide accurate information on the recyclability of our revolving doors and security access solutions. This information can be used to obtain building certification according to environmental standards such as BREEAM.

WORKING IT OUT

Our scientifically developed energy savings calculation software can calculate the environmental advantages of a revolving door compared to traditional sliding and swing doors. Taking the most relevant information on the building and local weather information from reputed weather stations, the programme can make an accurate and detailed calculation for your specific situation. This saving is part of our commitment to you regarding proving that your ROI is tangible.

BEYOND THE HANDSHAKE.

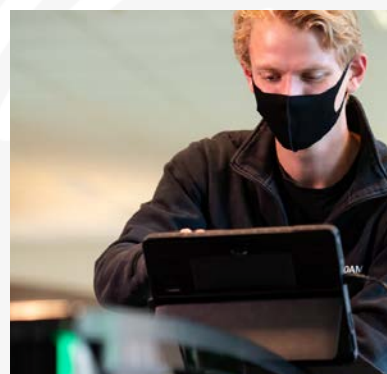

25

YOUR ENTRY EXPERTS | BOON EDAM

AFTERSALES CARE AND REPAIR SERVICES

With hundreds or thousands of visitors passing through an entry every day, entrance solutions rely on the continued reliable operation. Regular service and maintenance can prevent unexpected hardware and software breakdowns. Boon Edam's service network is experienced in the effects the local conditions have on the wear and tear of your entry solutions and can offer specialised service and maintenance contracts that correspond to those conditions perfectly.

TRAINING

All site operatives on joining Boon Edam receive induction training; this covers the safety procedures put in place by Boon Edam for safe site working, an overview of current legislation, annual handling and the safe use of chemical products.

Specialist training is also provided in the use of abrasive wheels, the construction of mobile access towers, first aid and driver training. Managers receive training in current legislation and the responsibilities placed on them by this legislation. We have recently implemented a programme of training operated by Human Focus to help further develop and broaden our employee's awareness of health and safety.

PRODUCTS

Due to the size and complexity of revolving doors, the training given for their installation service and repair is mainly carried out on-site, the training is given by experienced, competent installation or maintenance team leaders. Training is also supplemented by attendance at the Boon Edam manufacturing facility in Holland, where more specialised training is given in product working principles and the commissioning of products.

BS OHAS 45001

We are fully certified for BS OHAS 45001 and have in place an approved Health and Safety Management System. This accreditation further supports our commitment to health and safety in all we do, whilst assisting in and monitoring the ongoing improvements to our processes.

CSCS

All site operatives hold CSCS cards, all managers who are responsible for liaising with principle contractors and organising installation sites prior to operative's attendance hold CSCS cards, it is the intention of Boon Edam that all new employees are given the appropriate safety training to enable them to become cardholders. Project managers hold the SMSTS certification and all supervisory site engineers have attained the SSSTS certification.

EN 16005 & BS 7036

All site operatives who commission and service automatic door products are required to achieve authorised technician status. Investment in staff training is provided at all levels, and all departments, from Information Technology to Finance, Sales to Stores.

We help our customers to find the best entrance solution for safety and energy savings.

RETROFITS AND UPGRADES.

Entry requirements change as the way we work and live evolves. Rules and regulations are updated, and new technologies appear. Royal Boon Edam offers a range of services that ensure your entry remains up-to-date. Our retrofit packages update the technology of your entry to the latest sustainability standards or safety regulations. These packages consist of a number of technological improvements that can be installed separately or combined to provide customised solutions for every building. We also advise on further extensive and flexible retrofit projects that provide for invasive changes in the way a building is used such as upgrading security or increasing capacity in the entry.

WHEREVER YOU ARE THERE WE ARE.

We are a company rooted in rich tradition, but our board is far from old-fashioned. Based on our premium entry products, our entry solutions combine an innovative approach with a proven and reliable engineering quality that the world has come to expect from us. Because we work closely with you during the entire process, each entry solution is uniquely suited to your requirements resulting in significant improvements to the user experience. Below are a few of our segments of expertise:

- Airports and ports
- Banks and insurance
- Corporate HQ
- Data centres
- Education
- Gas, oil and energy plants
- Government
- Gym, sports, pools and wellness facilities

- Healthcare
- High street retail stores and jewellers
- Hotels
- Museums, cinemas, libraries, theatres and casinos
- Petrol stations
- Restaurants
- Shopping malls and supermarkets
- Stadiums
- Train stations and bus terminals
- Warehouses / distribution centres

Over the years we are proud to have aligned our efforts to produce some inspirational installations for global giants such as Philips Electronics, Unilever, TNT, Tele2 and Schiphol Airport. We understand not only that each market segment has its own criteria, but also that design has to meet security and functionality in the most balanced and efficient way.

WE ARE TRULY COMMITTED TO MAKING YOU FEEL WELCOME AND SECURE.

OUR REACH IS GLOBAL.

We have been in business for 150 years, manufacturing premium aesthetic and security entrance solutions in The Netherlands, the United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors, but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint and a personal grasp of local markets and their unique entry requirements.
