MEDIUM LEVEL SECURITY

DETECT.

MEDIUM LEVEL SECURITY SOLUTIONS

A security guard's best asset. An effective visitor management tool. A visual and audible "rock" in your overall security plan. Tailgating detection for effective reception area control. When it comes to reception area management, it is key to strike a balance between security and convenience for both employees and visitors. By using sophisticated sensor technology, entrance solutions that detect tailgating can recognize when more than one person has entered per authorized credential and will alert guard staff to respond immediately.

OPTICAL TURNSTILES.

When it is essential to balance security and visitor management, entrance solutions that detect tailgating and piggybacking attempts are key. Our speed gate solutions provide a strong visual obstacle against intrusion, and, when coupled with biometric and access control devices, can raise alarms to alert guard staff of unauthorized entry in real time. The physical barrier supports regulatory compliance and risk reduction at companies across the globe.

KEY BENEFITS

- Serves as a visual barrier against possible infiltration
- Assists guard staff in managing the flow of employees and visitors into a building
- Sensor system sounds an alarm when tailgating occurs, alerting guard staff to respond appropriately
- Ability to control the number and direction of people passing through the entrance
- Works in tandem with visitor management software for a digital record of all guests inside the building
- Integration is possible with virtually any access or biometric solution
- Supports anti-passback, preventing card holders from passing their card back for a second person to gain entry
- Aesthetic options allow for seamless integration with building interior or surround

ADVANTAGES FOR USERS

- A feeling of safety and security in the workplace
- A reduced pressure of having to enforce security rules when it comes to tailgating
- Intuitive and user-friendly

The physical barrier supports regulatory compliance and risk reduction for organizations across the globe.

PRODUCTS IN THIS CATEGORY.

THE LIFELINE SPEEDLANE SERIES

A sophisticated entry management system, the Lifeline Speedlane series of optical turnstiles expertly combine both design and security to create a medium level security entrance unlike any other in the market.

Designed with the entry experience in mind, the Lifeline Speedlane optical turnstiles are intuitive, interacting with all who approach them. When no one is around, an energy-saving mode turns off the indicator lights to reduce utility bills. As a user approaches, the nearest lane lights up with distinctive LED indicators, signalling the lane is ready-to-use and also where to present a credential.

After authorization, lights continue to guide the user through the tapered lane. The design-oriented Lifeline Speedlane series is effective at managing and channeling the flow of people entering and moving around buildings. This series of optical turnstiles is the most flexible regarding scalable flexibility and the opportunities to fine-tune to suit your specific needs.

OUR LIFELINE SPEEDLANE SERIES FEATURES THREE MODELS

Lifeline Speedlane Swing:

The slimmest cabinet width in the industry with swinging panels.

Lifeline Speedlane Slide:

A smart and solid gate with sliding panels.

Lifeline Speedlane Open:

The unobtrusive, barrier-free solution.

THE SPEEDLANE COMPACT

The newest addition to the Boon Edam premium range of optical turnstiles solves the issue of introducing security and safety into small and valuable areas of real estate spaces. The Speedlane Compact delivers all you fundamentally need in a barrier security lane, while confidently delivering all that is required to make your visitors feel welcome and secure - every day.

The Speedlane Compact:

Our shortest optical turnstile with an ample cabinet width to house a variety of access and biometric devices.

THE SPEEDLANE 300

Compact and practical, the Speedlane 300 is a stylish optical turnstile outfitted with illuminated angel wing barriers that change colors to indicate the status of the lane to the user. With its sleek, all-stainless finish, this speed gate is a sensible yet elegant solution for any budget.

MARKET SEGMENTS FOR MEDIUM SECURITY

- Office buildings
- Government
- Transit
- Education
- Museums
- Airports
- Leisure and recreation
- Manufacturing
- Financial

TOUCHLESS

At Boon Edam, we believe that innovation is the key to increased user experience. We've spent over 20 years enhancing our contactless solutions to meet modern demands, embracing the touchless future.

We can offer our customers solutions on existing entrances in terms of retrofits, as well as our own innovations. We also work with third-party access control and biometric devices to ensure the most complete, frictionless entrance solution available.

Opportunities for a 'touchless' medium security entrance include integration with:

- Facial recognition
- Iris scanner
- Access card and tag readers
- Mobile / Bluetooth readers
- Hand-wave sensors
- Free-out sensor activation

Speedlane Compact

LEVEL UP OVERVIEW.

If our standard specifications do not quite suit your need, we open up opportunities for you to 'Level Up' where it counts most. You can also do this according to your most motivating value driver.

Talk to your entry expert who is trained to work with you to know where you will get the most impact in terms of levelling up in the areas most essential to you.

You can Level Up in any of these categories:

THROUGHPUT

Add: Width / height / configurations

SECURITY

Add: Additional sensors / tall glass

SAFETY

Add: Fail-safe / fail-secure / audio and visual cues / touchless integration

AESTHETICS

Add: Material / color / branding

TECHNOLOGY

Add: Biometrics / access control integration

COMFORT

Add: Disabled entry / energy-saving mode

SERVICE

Add: Service and maintenance packages

TRAINING AND SUPPORT

With hundreds or thousands of visitors passing through an entry every day, proper installation and continued operation are vital. Professional installation and regular service and maintenance can help minimize unexpected down-times. Boon Edam's service and maintenance teams are familiar with the effects of throughput and local weather conditions on your entry and can offer service and maintenance contracts that correspond to your requirements perfectly. With a program of regular training and certification for all our installation and maintenance staff, their knowledge and experience are assured.

THIRD-PARTY INTEGRATION

Optical turnstiles must be integrated with an access control or biometric device to validate credentials and provide or deny access. There are a variety of options available for seamless integration between access and biometric devices and the turnstile itself. With growing popularity in high-rise buildings, destination dispatch systems can also be integrated with the turnstile for a sleek look with maximum functionality.

OUR REACH IS GLOBAL.

We have been in business for more than 140 years manufacturing premium aesthetic and security entrance solutions in the Netherlands, United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors, but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint as well as a personal grasp of local markets and their unique entry requirements.
