LOW LEVEL SECURITY

DETER.

LOW LEVEL SECURITY SOLUTIONS

While all security entrances are a physical deterrent against intrusion, full height and tripod turnstiles do not have presence sensors or alarms to alert guard staff of infiltration. Therefore, their presence serves as a deterrent against casual attempts at defeat by climbing or crawling over.

TURNSTILES AND ACCESS GATES.

Crowd control into a secured area should be easy and comfortable for all users. Our range of full height and tripod turnstiles as well as wide lane access gates provide precisely that.

These low security deterrent solutions are straightforward and effective in controlling large volumes of people as well as managing disabled access or large deliveries, which require additional room for a pleasant user experience.

KEY BENEFITS

- Serves as a visual deterrent against possible infiltration
- Assists guard force in managing the flow of employees and guests into a building
- Creates a visual and psychological balance between being welcome and secure
- Ability to control the number and direction of people passing through the entrance
- Works in tandem with visitor management software for a digital record of all guests inside buildings
- Integration possible with virtually any access solution
- Robust and durable construction for abusive environments

ADVANTAGES FOR USERS

- A feeling of safety and security in the workplace or public environment
- Easy, safe and fast to use

Low security entrances may also be used for “exit only”, allowing people to leave but deterring them from entering.

PRODUCTS IN THIS CATEGORY.

THE TURNLOCK RANGE

Suitable for both indoor and outdoor locations, the Turnlock range comprises of durable, low maintenance full height turnstiles. Created for high traffic areas in harsh conditions, our full height turnstiles can stand up to extreme environments with consistent, dependable operation.

OUR TURNLOCK RANGE FEATURES THREE MODELS:

Turnlock 100:

A rugged full height turnstile designed for harsh outdoor environments

Turnlock 150:

A versatile solution that combines durability with aesthetics, ideal for indoor and outdoor applications

Turnlock 200:

A transparent turnstile that provides the finished look of a revolving door and suitable for indoor applications

THE TRILOCK RANGE

Our Trilock range of tripod turnstiles cater for both robust exterior crowd control and provide chic interior entry-level security to support guard staff in busy areas. The range comes in a variety of sizes, and some even have the advantage of portability for security-on-the-move. Reliable and built to last – this range remains as popular as ever.

OUR TRILOCK RANGE FEATURES FOUR MODELS:

Trilock 75:

A robust and flexible tripod turnstile

Trilock 60:

Durable and portable tripod turnstile

Transpalock 900:

Elegant, glass waist high indoor turnstile

THE WIDE LANE ACCESS GATE RANGE

Side gates are an important component of your overall risk mitigation strategy. This type of entrance not only supports disabled access but also provides a comfortable alternative to users such as those who are carrying large bags, pushing strollers – or, are simply older and more comfortable with a wider option. These gates can easily integrate with other (higher security) lanes and with most access control systems.

OUR WIDE LANE ACCESS GATE RANGE FEATURES FIVE MODELS:

Winglock Swing:

An intuitive single-wing access gate that coordinates with the Lifeline series of optical turnstiles

Winglock 900:

An independent wide access gate

Twinglock 900:

An uncomplicated double-wing access gate

Turnlock Side Gate:

Full-height side gate to complement the Turnlock full height turnstile range

Trilock Side Gate:

A resilient waist-high side gate to complement the Trilock tripod turnstiles

TRAINING AND SUPPORT

With hundreds or thousands of visitors passing through an entry every day, proper installation and continued operation are vital. Professional installation and regular service and maintenance can help minimize unexpected down-times. Boon Edam's service and maintenance teams are familiar with the effects of throughput and local weather conditions on your entry and can offer service and maintenance contracts that correspond to your requirements perfectly. With a program of regular training and certification for all our installation and maintenance staff, their knowledge and experience are assured.

THIRD-PARTY INTEGRATION

All of the products in the low security entrance range can easily integrate with most access control systems. Dry contacts are provided, and the side gate can conveniently form part of your overall security picture, for example, via the BoonTouch. If you want to 'Level Up' the security of your optical turnstile, it is possible by seamlessly adding an additional access device such as a card reader or barcode scanner. This can be integrated on the products column, or we can provide you with a stand-alone pedestal which is perfectly coordinated to your other security entrances.

OUR REACH IS GLOBAL.

We have been in business for more than 140 years manufacturing premium aesthetic and security entrance solutions in the Netherlands, United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors, but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint as well as a personal grasp of local markets and their unique entry requirements.
