MEDIUM LEVEL SECURITY

SPEEDLANE COMPACT PLATFORM.

AN INNOVATIVE, **NON-ANCHORED ACCESSORY** FOR EFFORTLESS ENTRY CONTROL

Elevate your entrance solution with Boon Edam's Speedlane Compact Platform, a modular, adaptive platform designed exclusively for the Speedlane Compact Optical Turnstile. This innovative, floor-sitting platform eliminates the need for floor trenching or drilling, making it ideal for buildings where traditional trenching is not feasible or permitted. Along with its free-standing capabilities, it can also be securely anchored to the floor when conditions allow, providing adaptable options to suit your facility's unique needs.

OVERVIEW

The Speedlane Compact Platform is a versatile, no-drill flooring solution that enhances Boon Edam's Lifeline Speedlane Compact optical turnstile. Designed for locations where trenching or drilling isn't an option, this modular platform provides a seamless, ADA-compliant foundation for secure entry lanes in various configurations. It can be installed as a free-standing solution or anchored into the floor if conditions permit, offering flexibility to meet your facility's specific requirements. With customizable finishes and built-in conduits for streamlined power and wiring, the Speedlane Compact Platform offers a high-performing, adaptable entry solution for any space.

BUILT-IN CONDUIT FOR POWER AND LOW-VOLTAGE WIRING

The Speedlane Compact Platform provides standard ½" conduit for mains power to reach each e-tray on Primary and Interlane cabinets. Its raised floor structure enables low-voltage wiring to be neatly routed underneath the platform, maintaining a clean look. For facilities requiring each lane on a dedicated circuit, additional conduit options are available.

ADA-COMPLIANT AND STRUCTURALLY ROBUST

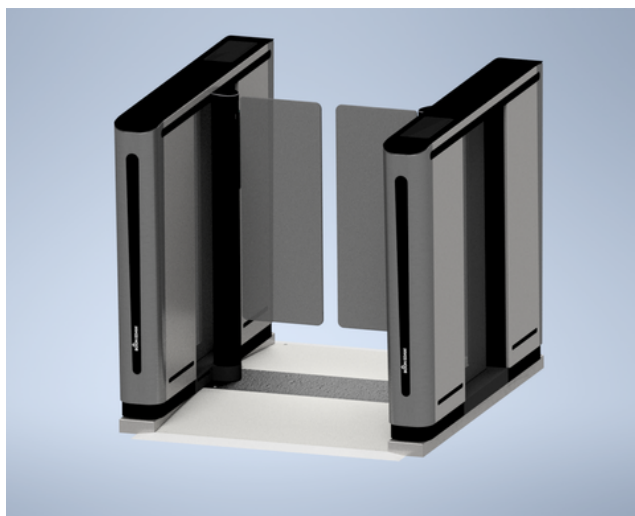

Safety and accessibility are our priorities. This platform supports a weight capacity of 500 lbs per square foot, making it ADA-compliant and robust enough for heavy foot traffic. With a deflection of just 2mm, the platform maintains its shape under pressure, ensuring stability and comfort.

FLEXIBLE AND MODULAR DESIGN

Our platform system can be configured to fit various entrance layouts, from a single lane to expansive multi-lane arrays, ensuring an adaptable solution for any facility's needs. We also offer a Winglock Swing gate option that integrates seamlessly with Speedlane Compact, allowing for added versatility in layout and design.

CUSTOMIZABLE FINISHES FOR A SEAMLESS AESTHETIC

Choose from an array of powder-coated surface finishes to complement your space's style. For safety, our ramp finishes include an anti-slip powder coating, with an option for #4 stainless steel tread plates to enhance durability and aesthetics.

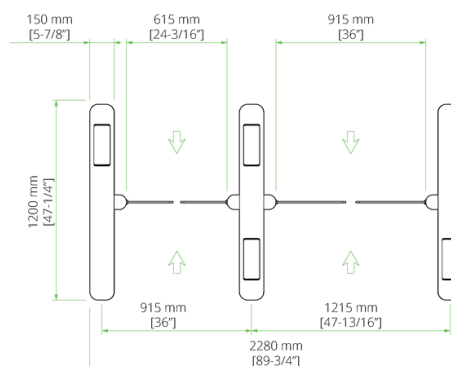

SPEEDLANE COMPACT OPTICAL TURNSTILE CONFIGURATIONS

Choose the setup that best suits your entrance requirements:

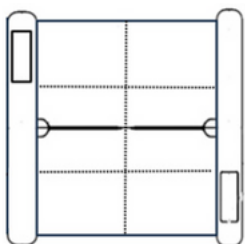

- Standard Width
- Wide Width (ADA): 36" Clear Opening
- Single Winglock Swing Optical Gate: Available in multiple widths
- Double Winglock Swing Optical Gate: Multiple width options
- Combinations of the above for a fully customized layout

With the Speedlane Compact Platform, you can bring a higher level of convenience, safety, and customization to your entry management without altering your existing floors.
