HIGH LEVEL SECURITY

TOURLOCK 120S.

THE **ONE-WAY** SECURITY DOOR **FOR EXIT ONLY**

The Tourlock 120S is a one-way, automatic security revolving door ideal for applications where a high-capacity, exit-only solution is needed in, for example, airport terminals and court houses. This automatic 3-wing door is available in virtually every color or finish to match modern or traditional surroundings.

OVERVIEW

The Tourlock 120S is an automated three-wing security revolving door ideal for public use. The three wings provide more space in each segment, giving the authorized user a comfortable experience when traveling through. The Tourlock 120S offers a moderate throughput level, supporting traffic in one direction only.

PREVENTS RE-ENTRY THROUGH DOOR

This door is used for one-way traffic only. Once a user has passed through the door, if they turn around and try to re-enter the door they will step onto a contact mat and the door will stop rotating and issue an audible message instructing them to exit the door. The Tourlock 120A should be monitored by guard staff to address anyone using the door improperly. The door is outfitted with a number of automatic door safety features, including adjustable speed settings, a "push to slow" button and an "emergency stop" button.

SIMPLE AND EFFECTIVE

The Tourlock 120S is used by the general public for one-way exit scenarios, like in courtrooms, airport terminals and concourses, museums and recreational facilities. Like all automatic revolving doors, rotation is activated when someone approaches the throat opening of the door. The door requires no contact from users in order to operate normally.

TOUCHLESS OPTIONS FOR A NEW WORLD

The Tourlock 120S is a fully automatic revolving door and therefore supports creating a fully touchless experience for users in a facility.

KEY FEATURES

- One-way exit rotation prevents re-entry through use of contact mat and sensors
- Onboard user communication system
- Premium quality materials
- Energy-saving benefits through "always open, always closed" operation

KEY BENEFITS

- Handles moderate building throughput
- Supports security staff
- Elevated aesthetic fits into building design

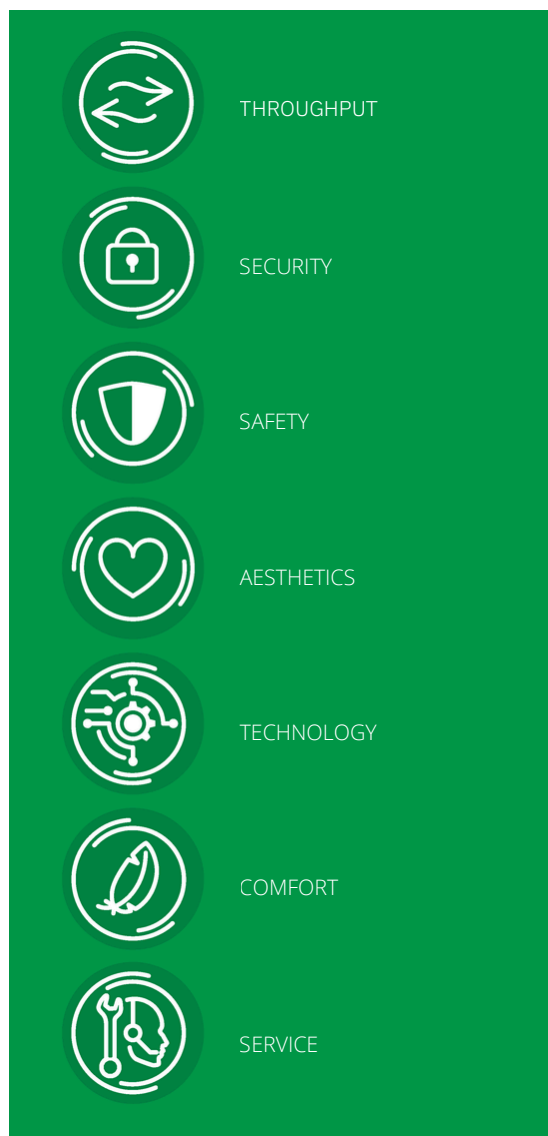

PART OF THE BIGGER PICTURE

Boon Edam products form part of the overall security of a facility, especially when we are talking about the introduction of high-level security in the form of security doors. The Tourlock 120S can be integrated with an array of modern and technologically advanced devices to mitigate risk. We work closely with suppliers of devices such as card readers, barcode scanners, keypads, video surveillance, etc., and have spent years building good relationships to help our customers get even more out of their Boon Edam entrance solutions.

SUGGESTED SEGMENTS

- Airports
- Courtrooms
- Museums
- Recreational facilities
- Class A office buildings
- Financial
- Technology
- Government / military

WORKING PRINCIPLE

TECHNICAL DIMENSIONS

The Tourlock 120S offers effective one-way traffic and eliminates re-entry attempts.

SERVICE AND MAINTENANCE

With hundreds or thousands of visitors passing through an entry every day, continued and reliable operation is vital. Regular service and maintenance can prevent unexpected hardware breakdowns. Boon Edam's service and maintenance teams across the world are experienced in the effects the local conditions have on the wear and tear of your entry solutions and can offer specialized service and maintenance contracts that correspond to those conditions perfectly.

COMPLIANCE

Boon Edam security entrances are trusted solutions that allow organizations to meet compliance regulations related to restricting access to areas within a building. We take compliance and safety very seriously and ensure that our products are manufactured, installed and maintained to keep up the strict criteria required in all our countries. We are always improving and always committed to making sure our products are compliant and certified. More information can be found on our website under 'About Us'.

OUR REACH IS GLOBAL.

We have been in business for more than 150 years, manufacturing premium aesthetic and security entrance solutions in the Netherlands, United States of America and China. We can confidently say that we cover every corner of the globe with subsidiary companies in major cities across the globe. Furthermore our global export division not only partner with our distributors but also offer direct sales and service to every territory. This wide net allows us to have a strong global footprint as well as a personal grasp of local markets and their unique entry requirements.
